## The solar system

Do you know how are the inner planets of the solar system?

Well if you don't know.  
We are going to tell you

Sun	Mon	Tue	Wed	Thu	Fri	Sat
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	

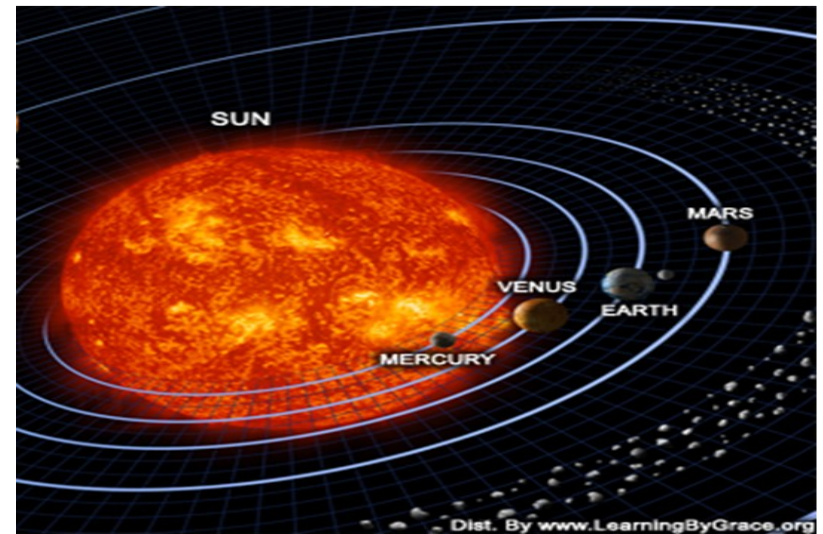

# MAY 2010

The solar system is very big and has 9 planets, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto. The solar system is divided in two parts the inner, and the outer planets, they are divided by the asteroid belt.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
						1
2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29
30	31					

# JUNE 2010

The inner planets are Mercury, Venus, Earth, Mars. Over there is the hottest planet that is Venus because Venus has a very thick crust so it don't let the sun's heat get out of the planet, Mercury is don't the hottest planet because has a thin crust.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30			

# JULY 2010

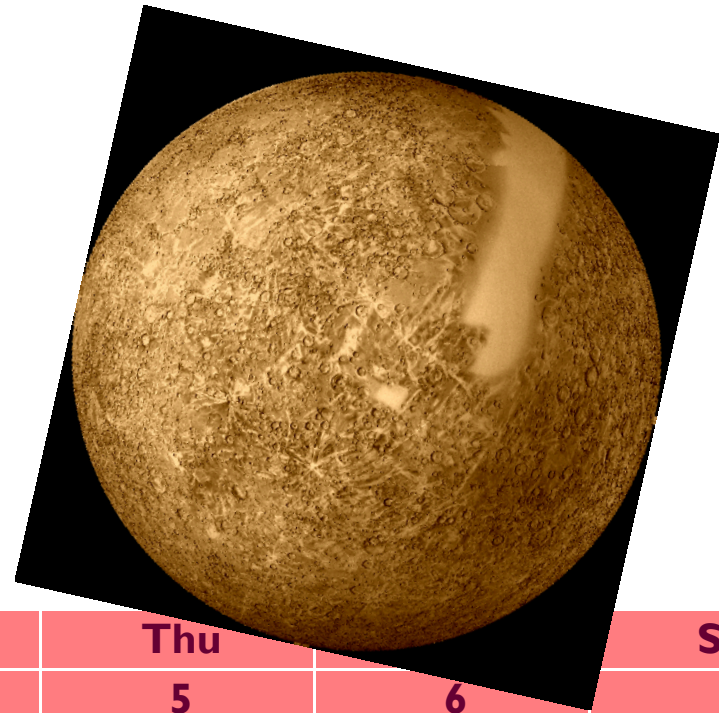

The outer planets are Jupiter, Saturn, Uranus, Neptune, and Pluto. All are called the giants gasses except Pluto.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

# MERCURY

## AUGUST 2010

Mercury is the first planet of the solar system. It takes 87.9 days orbiting the Sun. It has the smallest axial tilt. It completes three rotations about the axis for every two orbits.

Sun	Mon	Tue	Wed	Thu		Sat
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

# Venus

SEPTEMBER 2010

Venus is the second planet from the sun. It is almost the same size as the Earth and is covered by a thick layer of clouds. The air on Venus would be poisonous to people.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
			1	2	3	4
5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30		

# Earth

OCTOBER 2010

Earth is our planet. It is a huge ball that travels in the space around the sun. Also slowly spins around. Any one moment, only half of earth faces the sun. The side facing the sun has day and the other night. It takes 24 hours for earth to spin around once.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
					1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16
17	18	19	20	21	22	23
24	25	26	27	28	29	30
31						

# Mars

## NOVEMBER 2010

Mars is the fourth planet from the sun. It is about half as big as the earth. Mars is more like earth than any other planet in the solar system. Its surface is like a very cold desert. There is ice, but no liquid water. Mars has reddish-brown rocks and soil. we often call mars the red planet because from the earth, it looks bright red in the night sky.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30				

# Asteroid belt

## DECEMBER 2010

Between Mars and Jupiter, is a belt of rocky and carbon-rich planetimals that never coalesced into planet. This is called the asteroid belt, and the bodies composable it are known as asteroids. Gravitational disturbances caused by the massive, nearby planet Jupiter probably kept the asteroids
