CUCACION

The nine planets

Mercury is the closest to the sun, Venus is the hottest thanks to its thick atmosphere, Earth is the only one that has life, Mars

Is red, Jupiter has a giant tornado, Saturn has rings, Uranus turns bad, Neptune is very windy and Pluto is the coldest.

The Earth

The earth is our home is the only planet that has life thanks to its atmosphere gravity water plants and oxygen

Other things
you would
like to know

Many astronomers like Galileo Galilei and Nicolas Copernico have tried to find life but they couldn't.
