

PLANETS

Mercury can be seen before the sunrise or after the sunset.

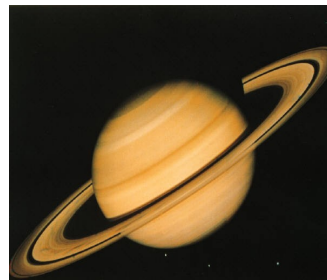

The **earth** change of season is caused by its tilt on its axis.

MARS : Mars is cover with iron so it can look red

The rings of **Saturn** are made up of: dust and ice.

JUPITER have a big red spot that is a giant storm on its surface.

Venus: The reason of why Venus get so hot is because it is near the sun and has a thin surface.
