

ARTIFICIAL INTELLIGENCE

GABRIELA R, ISABELLA P, TATIANA O.

AI

ACCESS

Recently, access to AI has increased. Anyone can easily connect to one due to multiple platforms making their own virtual helper. AI can present benefits as well as risks.

IT IS HERE TO STAY:

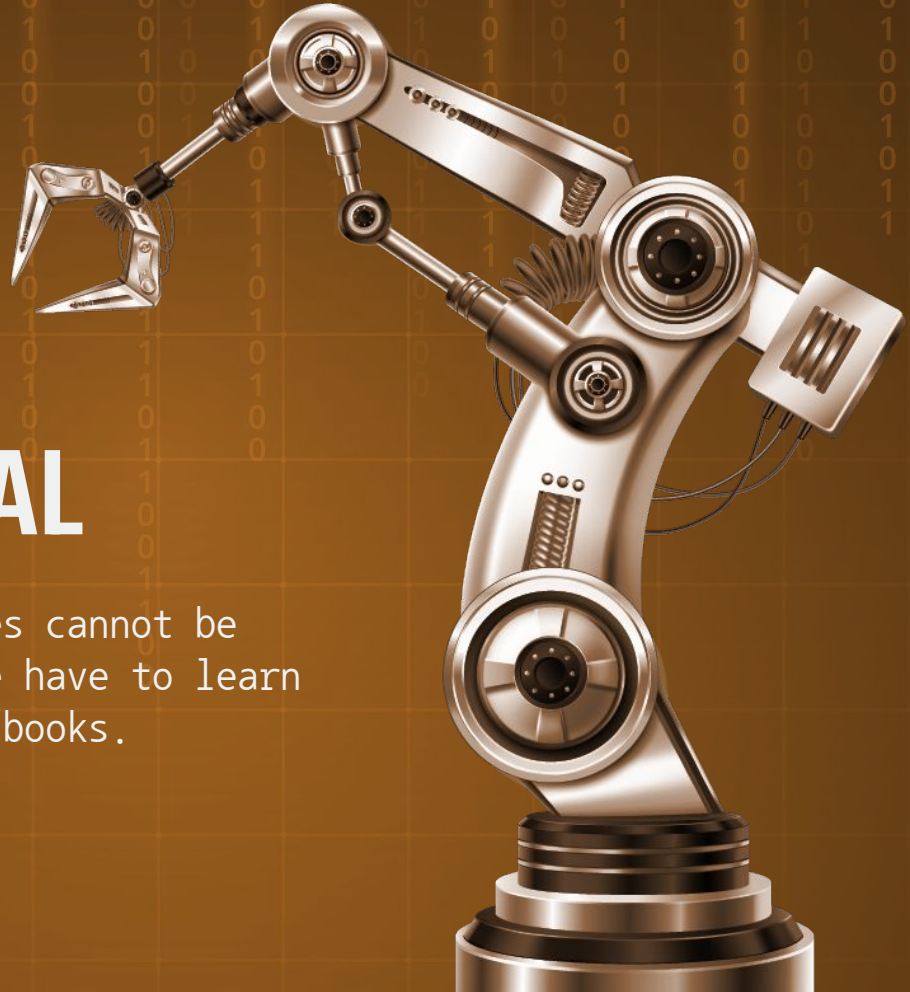

Multiple investments and new uses for artificial intelligence are making this type of technology more permanent. Because of this we should take the next safety measures:

01

BE CRITICAL

The credibility of sources cannot be evaluated by AI therefore we have to learn to use articles and books.

02

WATCH OUT FOR CHATBOTS

Chatbots have no moderation on displaying inappropriate content. They can also manipulate people into different contexts because of this same characteristics

03

IMAGES ALSO MATTER

When uploading personal images of your face or any personal info, AI could be able to discover more personal info compromising you safety.

CONCLUSION

Even though AI is a magnificent improvement for humanity, it can present some risks. Therefore, we should implement multiple safety measures.
